June 6th 2016

This informational notice is to advise all Clarksburg Condominium II unit owners and residents of the opportunity to collect a FREE water alarm to be installed in your water heater pan. These alarms are being made available due to the costly repairs that faulty and/or old water heaters can cause to both unit owners and the Association. In 2015 there were four instances of leaking water heaters that ultimately caused thousands of dollars in damage to the respective units as well as to the units below. So far, in May of this year, there have been 3 reported leaking water heaters! In an effort to combat this issue, the Association is providing FREE water alarms to the residents of CCII for use in their water heaters. To collect your FREE alarm, please note the information below:

Do I need an Alarm?

Although we try to be the best unit owners we can be, we sometimes forget about the routine maintenance required for the upkeep of major appliances, especially for our water heaters, making leaking water heaters a challenge to catch until it's too late. To put the cost associated with damage into perspective, in 2015 the Association spent nearly \$20,000 repairing water damage caused by faulty water heaters! A simple water alarm installed in the pan of your water heater can make a big difference to both owners as well as the Association.
